

Issues & Trends in Industrial Wastewater Treatment

February 7-8, 2012 | Canad Inns Polo Park, Winnipeg

During this two day seminar, industry professionals will discuss a variety of regulatory and process concerns that arise with treating industrial wastewater. Through case studies and real-life examples they will explore options, problems, and solutions as well as inform attendees of up-coming trends in this field.

Day 1 will be followed by a mini tradeshow to allow attendees to visit with suppliers and gain useful information on the latest products in wastewater treatments.

This seminar will also include a tour of the Simplot Foods processing plant as well as their wastewater treatment facility

See <http://www.wcwea.org/dspBasePage.php/13> for complete seminar information
