

# Stormwater Matters Flood Protection Works & Climate Change Adaptation

14 June 2017 | Winnipeg MB

The session is being created with support from the Western Canada Water Environment Association and the Water Environment Federation (WEF) Stormwater Institute. The WEF Stormwater Institute is a center for excellence and innovation focused on developing best-in-class solutions to stormwater runoff and wet weather issues. The institute is identifying cross-cutting issues, convening experts to tackle those issues, providing insights and leadership to policymakers, and helping chart a new course toward a healthier and more sustainable stormwater system.

The workshop will include information from owners, regulators and practitioners across sectors which are most impacted by stormwater management and will present aspects of stormwater to be relevant to Manitoba stormwater drainage and flood protection.

FEATURING Key Note Speaker - Roger Rempel, Risk Sciences International

With Presenters - Fisaha Unduche, Manitoba Infrastructure; Dietmar Straub, University of Manitoba; Steve Frey, Aquanty Inc; Lisette Ross, Native Plant Solutions; Duane Griffin, City of Winnipeg; Ray Offman, KGS Group; A.J. Miller, Manitoba Infrastructure

*Application for 0.6 CEUs is being made for this Workshop*
